Job Overview

Agriweld is a leading British manufacturer of agricultural machinery and material handling attachments. We are looking for an experienced practical, reliable Agricultural Product Assembly Technician with previous hands-on experience with **agricultural equipment** and a solid understanding how **hydraulic systems operate**. This role is central to ensuring our products are built to the highest standards of safety, quality, and performance.

The role would be suitable for individuals from the following background examples: Agricultural field engineers, farm workshop fitters, agricultural machinery manufacturing, those from an arable farming background, hydraulic/mechanical technicians and heavy plant engineers.

Key Responsibilities:

- Assemble agricultural machinery and attachments following technical drawings, build sheets, and standard operating procedures.
- Fit and route **hydraulic hoses, valves, rams, and pipework**, ensuring correct installation and leak-free operation.
- Carry out mechanical assembly including bolting, torquing, fitting components, and basic fabrication tasks.
- Work closely with the Assembly Team and Production Manager to meet daily build targets and maintain workflow efficiency.
- Conduct basic functional checks on assembled units, including hydraulic testing where required.

- Operate company devices to perform digital quality checks and update task lists in real time.
- Report any build issues, missing parts, or design concerns promptly to support continuous improvement.
- Maintain a clean, safe, and organised work area in line with Agriweld's health and safety standards.
- Support other workshop areas when required to ensure smooth production flow.
- Work collaboratively with other departments to ensure smooth running of the department.

Skills & Experience Required (essential)

- Previous experience working with **agricultural machinery**, farm equipment, or heavy plant.
- Practical understanding and previous experience working with **hydraulic systems** (hoses, fittings, rams, valves, routing, safety).
- Ability to read and interpret assembly instructions/drawings.
- Ability to use basic digital software and devices to complete certain tasks.
- Confident using hand tools and power tools
- Strong attention to detail and pride in producing high-quality work.
- Good communication skills both written and verbal and a proactive approach to problem-solving.
- Ability to work independently and as part of a small, fast-paced team.

Desirable (Not Essential)

- Forklift truck or telehandler license
- Tractor driving experience

What We Offer

- Competitive pay & additional leave
- Training in company processes and development in the role
- A supportive team environment
- The chance to contribute to high-quality British-built machinery
- Employee Assistance Programme (Health & Wellbeing)

Please note there is no public transport to the village therefore own transport is essential.

Starting pay is dependent on skill level and experience.

If you are eager to continue a career in agricultural assembly and feel you can contribute positively to our team, we encourage you to apply for this exciting opportunity!

Please do not apply for this position if you do not possess the skills and experience listed as essential for this role.

Job Type

Full-time, permanent (40 hours, Monday to Friday)

What We Offer

- Competitive pay and additional leave
- Training in company processes
- A supportive team environment
- The chance to contribute to high-quality British-built machinery
- Employee Assistance Programme (Health & Wellbeing)
